Stealth Introduces Metal Encapsulated LCD Monitor for Harsh Environment Applications

Toronto ~ January 10, 2008 – Stealth Computer Corporation has introduced their new [TuffTouch](#) Industrial Grade LCD monitor. Stealth's TuffTouch is a rugged versatile touch screen LCD monitor designed to stand-up to the rigors of industrial and commercial environments.

The 17 inch all-steel enclosed touch screen LCD Monitor is built to withstand the demanding effects of harsh environments typically encountered in industrial plant floor environments. The NEMA 4/IP 66 LCD front-panel withstands water, dust and dirt intrusion and performs well beyond ordinary commercially available monitors. The high precision, metal encapsulated 17 inch viewable display is capable of running resolutions up to its native mode of 1280 x 1024 pixels with both analog and digital input sources. The TuffTouch features low power consumption, wide viewing angles, superior image quality with 250 nits of brightness, 8ms response time and a contrast ratio of 500:1

TuffTouch is available with resistive and capacitive touch screen options and includes a wide-range of versatile mounting options such as wall, bench top, pendant arm and ceiling mounts. All Stealth LCD monitors are plug & play capable requiring no video drivers or special interface cards.

The Stealth TuffTouch LCD's are ideal choices for applications such as, Human-Machine Interface, Factory Automation, Process Control, Interactive Kiosks or demanding applications where vital information must be displayed.
