Stealth Wins “Engineers Choice Award” from Control Engineering Magazine for their Powerful Mini Computer

Toronto ~ February 5, 2008 – Stealth Computer Corporation, a market leader in the industrial computer and peripherals market won Control Engineering’s 2007 Engineers Choice Award for its LPC-450 small form factor computer. Control Engineering is a Chicago based trade publication that gives only 15 awards to makers of hundreds of products covered in the publication each year. The award was officially announced February 4th, 2008 based on the 2007 year in review.

Winning products were selected by Control Engineering subscribed readers who are responsible for or influence technology purchases, or have hands-on day-to-day interaction with the technologies in each respective area. Control Engineering will publish a special supplement with the February issue where the winners will be announced. Photographs of the winning products, as well as the brief product descriptions submitted as part of the nomination process, will be printed.

The Stealth LPC-450 Little PC utilizes Intel’s latest Core 2 Duo processor technology delivering the ultimate in mini pc performance. Housed in a rugged aluminum enclosure this powerful & versatile machine measures out at 5.7”(W) x 9.9”(D) x 1.65”(H) or about the size of a hard cover novel yet surpasses the performance of most desktop and notebook PCs available today.

“The Stealth Model: LPC-450 is the most powerful small form Little PC we have ever offered. This full featured machine utilizes the latest Intel Core 2 Duo processor technology and we believe it offers the most processing power per square inch of any personal computer available today.” stated Ed Boutilier, President & CEO of Stealth Computer Corporation.
